Web Applications Development
Undergraduate Certificate

The **Web Applications Development Certificate** includes a sequence of five courses that teach how to design and build advanced web applications. It provides an introduction to Hypertext Markup Language (HTML), Cascading Style Sheets (CSS) and software development with PHP. Students learn features common to all programming languages, including variables, arrays, functions and control constructs. Build skills that can give you greater opportunities in the field of technology.

Curriculum: (15 credits)

Prerequisites may be required. Visit program page for details.
